***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: Claim 1 recites a refrigerator with a door on a drawer. The door has a rotation axis with a gasket below the axis and a cushioning member between the gasket and the edge portion of the door that prevent over compression of the gasket. Koch teaches a cushioning member between the edge portion of the door and the gasket, but does not teach or suggest the member on the same side of the axis of rotation or to prevent over compression. Claim 11 recites a door with a gasket and a cushioning member as a roller that provides rolling contact between an outer edge of the door and the apparatus to prevent over compression of the gasket. Koch does not teach or suggest that the cushioning member is a roller providing rolling contact to prevent over compression of the gasket.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
